Fat Loss Meal Plan for Men

(Drop 4kg in 4 weeks)

Welcome !

Thank you so much for downloading my resource. Congratulations on taking the first step in your fitness journey.

Who am I ?

My name is Nikhil Xavier D'Souza, some of my friends call me NXD.

I am a Certified Nutritionist + Personal Trainer + Prehab and Rehab Specialist.

I specialize in helping people achieve **Sustainable Fat Loss** by finding the formula that works for them and their lifestyle. I hate the misinformation that people spread online in order to sell supplements and magic fat loss potions.

I enjoy playing sports and have always been close to fitness since my school and college days. Now, I can happily say that I have dedicated my life to fitness, and specifically coaching people just like you. Here is what a few of them have done.

What my Clients have achieved

Here are some of the results my clients have achieved using my approach to fitness.

BackOnTrack for Life

Month 1
125 Kg

Month 6
101 Kg

3 MONTH PROGRESS

Before
135 Kg

After
122 Kg

The Back on Track Program

What is the Back on Track Program?

The Back on Track Program is designed to help fellow Working Professionals get their health back on track after spending countless hours working at their desk jobs with simple efficient workouts.

There are 3 components to this program

- 1.Nutrition
- 2.Training
- 3.Mindset.

Keep in mind, once you get Nutrition right, you will start seeing positive results in a few days.

Basics of how weight loss works

You need to be in a caloric deficit to actually see the number on the scale go down, but without the right proportion of macro nutrients you will lose all the muscle and retain the fat. Too much cardio will also lead to you looking skinny fat.

The right nutrition is the most important step to

sustainable weight loss and that is why I have this guide for you.

How should you track progress?

1. Take a note of your bodyweight, first thing in the morning, before you consume anything (even water).
2. Take 3 progress pictures every week

Should I be doing cardio?

Cardio isn't necessary but it helps if your goal is to drop 4kg per month. Without cardio you will drop approximately 2kg per month.

How to start with cardio?

- walk at least 30 minutes per day
- increase the steps by 10% per week
- slowly build up to 8k to 10k steps a day

Is resistance training required?

Yes, it is.

Without the right resistance training workouts, your body will be burning off the muscle mass and leaving the fat as it is. This is why most people look skinny fat. Don't be them.

However, before getting started, do check with a professional like myself if your core and back strength are sufficient to exercise without injury.

Please note : all foods should be measured **RAW**, especially lentils.

Non Veg Meal Plan

Just follow the meal plan below to ensure consistent weight loss.
